

LUNCH BITES

What is a Watershed?

Hint: it is NOT a shed that has water in it! A watershed is the area of land that surrounds a river or stream. The water that falls as rain or snow in the higher parts of the watershed flows, melts and/or drains down into the river or stream. Each watershed is named after the main river or stream that the water eventually flows in to. In Bend, we live in the Upper Deschutes Watershed.

Join us at the Upper Deschutes Watershed Council to see how you can build your own watershed and watch how water flows.
